The 3rd International Thematic Program
January 4th – 17th, 2015

Eco-Tropical2015

Fostering the Environmental Sensitivity: A Spatial Study of the Diverse Landscape of Yogyakarta

A 14-day international summer program for **Undergraduate** and **Graduate** Students who have an IMMENSE interest and are KEEN to make a contribution in Ecological Issues. This intensive program consists of Class Lecture, Site Visit Lecture, Focus Group Discussion, and Action Plan Presentation which will be attended by associated stakeholders, key people of UGM, and provincial government.

- Pursuing the global challenge on education and environment.
- International nuanced platform to learn the unique landscape of Yogyakarta as well as culture.
- Contributing to the development of society based on the natural sciences.
- Accomodating the specific ideas and constructive plannings from participants to the particular legal institution and community.
- Building the Cross-Cultural Understanding and Youth Network among the International participants during the stay in Yogyakarta.

The terminology of Tropical Ecology is represented by the diversity of Yogyakarta landscape. Special attention is given to fundamental concepts of Ecology which are outlined into eight topics:

1. Volcanic Ecosystem
2. Sustainable Agriculture
3. Urban Ecosystem and Planning
4. Ecological Humanities
5. Wildlife Management and Conservation
6. Karst Ecosystem
7. Critical Land Rehabilitation
8. Coastal Ecosystem
